

LARYNGOSCOPE & COMPONENTS

Viewmedica has a range of Laryngoscopes
Conventional / Fibre Optic / Re-Usable / Disposable.

Oxiport LARYNGOSCOPE

It is a modification blade that allows the individual to perform fiberoptic intubation with less risk of hypoxia. Built into the macintosh blade is a tube that permits delivery of oxygen and other gas mixtures during intubation, adding an extra advantage to an already widely used blade.

FEATURES:

- All Blades come with quick to remove lamp at the front of blade.
- With reliable 2.5 V vacuum light source for good illumination of examination area.
- Specially designed blades for easy intubation.
- All are made of stainless steel rust proof.
- Matt finishes to reduce glare.
- Choice of power source to use 'AA' and 'C' type batteries.

Oxiport Macintosh Laryngoscope Blades

Size	Length	Distal End Width	Ref. Code
Mac 1	91mm	11mm	LC 1025 1
Mac 2	110mm	13mm	LC 1025 2
Mac 3	134mm	15mm	LC 1025 3
Mac 4	154mm	15mm	LC 1025 4

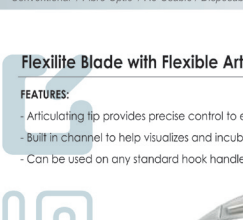

Oxiport Miller Laryngoscope Blades

Size	Length	Distal End Width	Ref. Code
Mill 0	77mm	9.5mm	LC 1026 0
Mill 1	100mm	9.5mm	LC 1026 1
Mill 2	152mm	13mm	LC 1026 2

Chhota Flange Macintosh Blade

Size	Length	Distal End Width	Ref. Code
Mac-3	134mm	15mm	LC 1027 0

LARYNGOSCOPE & COMPONENTS

Viewmedica has a range of Laryngoscopes
Conventional / Fibre Optic / Re-Usable / Disposable.

Flexilite Blade with Flexible Articulating Tip

FEATURES:

- Articulating tip provides precise control to elevate epiglottis.
- Built in channel to help visualizes and incubates with an unobstructed view.
- Can be used on any standard hook handle.

Size	Length	Distal End Width	Ref. Code
2	101mm	11mm	LC 1019 2
3	135mm	15mm	LC 1019 3
4	158mm	15mm	LC 1019 4

LARYNGOSCOPE & COMPONENTS

Viewmedica has a range of Laryngoscopes
Conventional / Fibre Optic / Re-Usable / Disposable.

FIBER OPTIC LARYNGOSCOPE

Fiber Optic Laryngoscope blades are available with high quality glass fibers for maximum light Superior fiber for optimum light color of illumination.

FEATURES:

- High quality fibers ensuring excellent light.
- No possibility of loose bulb entering oral airway.
- No trauma causing Hot Bulb.
- Cool high power light.
- No flickering.
- All are made of stainless steel rust proof.
- Matt finishes to reduce glare.
- Choice of power source to use 'AA' and 'C' type batteries.

Macintosh Fiberlite Blades

Size	Length	Distal End Width	Ref. Code
Mac 0	80mm	9mm	LC 1017 0
Mac 1	91mm	11mm	LC 1017 1
Mac 2	110mm	13mm	LC 1017 2
Mac 3	134mm	15mm	LC 1017 3
Mac 4	154mm	15mm	LC 1017 4
Mac 5	174mm	15mm	LC 1017 5

LARYNGOSCOPE & COMPONENTS

Viewmedica has a range of Laryngoscopes
Conventional / Fibre Optic / Re-Usable / Disposable.

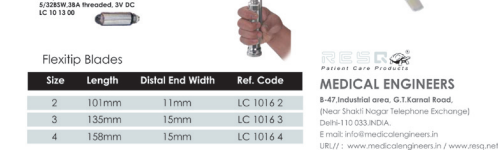

FLEXIBLE TIP LARYNGOSCOPE BLADE

FLEXITIP is modified English Profile Macintosh Laryngoscope blade with a tip which is adjustable. A lever controls the tip angle during intubation to lift the epiglottis to give a clear view of the vocal cords. Contact with the upper row of teeth and unnecessary pressure on the tongue and soft tissue are avoided.

FEATURES:

- All Blades come with quick to remove lamp at the front of blade.
- Available in size 2,3, & 4.
- Specially designed movable tip facilitates difficult intubation.
- All are made of stainless steel rust proof.
- Matt finishes to reduce glare.

Size	Length	Distal End Width	Ref. Code
2	101mm	11mm	LC 1016 2

LARYNGOSCOPE & COMPONENTS

Viewmedica has a range of Laryngoscopes
Conventional / Fibre Optic / Re-Usable / Disposable.

STANDARD LARYNGOSCOPE

The quality laryngoscope with vacuum illumination convince their interesting cost effectiveness due to an almost ultimate services life. Well in through out design guarantees simple handling in daily use.

FEATURES:

- All Blades come with quick to remove lamp at the front of blade.
- With reliable 2.5 V vacuum light source for good illumination of examination area.
- Specially designed blades for easy intubation.
- All are made of stainless steel rust proof.
- Matt finishes to reduce glare.
- Choice of power source to use 'AA' and 'C' type batteries.

INTUBATION INSTRUMENTS

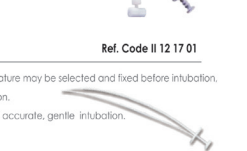

Viewmedica has a range of Malleable Stylet
Fibre Optic / Re-Usable / Disposable.

Fibreite Malleable Stylet & Handle

Ref. Code II 12 15 01

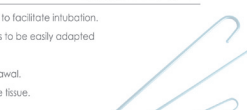

- Malleable Fibre Optic Intubating Stylet Size 25cm or 38cm.
- Solid Handle made of chromium plated metal with lamp.
- Knurled handle made surface a secure grip in hand.
- On/off Switch at the base of the handle.
- Simple change of batteries (2 AA size) at the base of the handle.
- Batteries are not supplied.

Malleable Stylet

Ref. Code II 12 16 01

Made from malleable stainless steel
Available in three sizes Small, Medium & Large
for all Endotracheal tubes 2.5mm to 11.00mm

Flexible Stylet

Ref. Code II 12 17 01

Directional Stylet is an articulating stylet whose curvature may be selected and fixed before intubation, or controlled by easy thumb action during intubation. Its convenient, one-operation is designed for quick, accurate, gentle intubation. It is suitable for oral and nasal use

Intubating Stylet

Ref. Code II 12 18 06-14

- The Stylet designed for pre-forming the tracheal tube to facilitate intubation.
- Made of malleable aluminium which allows the stylets to be easily adapted to the desired shape.
- Smooth PVC sleeve permits easy insertion and withdrawal.
- Have smooth formed tip which reduces trauma of the tissue.
- Single use so reduces risk of cross infection.
- Choice of 3 sizes to fit the majority of adult and paediatric tracheal tubes.

Size	OD	Ref. Code	Recommended Tracheal tube sizes (ID) (mm)
1R	2.0mm	II 12 18 06	2.5 - 3.5
10R	3.3mm	II 12 18 10	4.0 - 5.5
14R	4.7mm	II 12 18 14	6.0 - 10.0

INTUBATION INSTRUMENTS

Viewmedica has a range of Airways
Re-Usable / Disposable / Reinforced

LARYNGEAL MASK

The Laryngeal mask is a supraglottic airway management device. All patients should have the optimal catheter for their personal situation. We have eight different size from neonate to adult. Good seal and easy position cuff.

Standard Laryngeal Mask Disposable

- Made from silicone rubber.
- Soft seal cuff can be insert comfortable.
- Strength neck prevents folds during insertion.
- Thin wall pilot balloon provides precise indication of inflation.

Standard Laryngeal Mask Reusable

- Made from pure medical grade silicone.
- Soft seal cuff can be insert comfortable.
- Strength neck prevents folds during insertion.
- Thin wall pilot balloon provides precise indication of inflation.
- Reusable type must be sterilization before use, use only 40 times.

Reinforced Laryngeal Mask Disposable

- Made from silicone rubber.
- Soft seal cuff can be insert comfortable.
- Strength neck prevents folds during insertion.
- Thin wall pilot balloon provides precise indication of inflation.
- Kink-free wire reinforced tube eliminates the risk of airway tube occlusion.

Reinforced Laryngeal Mask Reusable

- Made from pure medical grade silicone.
- Soft seal cuff can be insert comfortable.
- Strength neck prevents folds during insertion.
- Thin wall pilot balloon provides precise indication of inflation.
- Kink-free wire reinforced tube eliminates the risk of airway tube occlusion.
- Reusable type must be sterilization before use, use only 40 times.

INTUBATION INSTRUMENTS

Viewmedica has a range of Airways
Re-Usable / Disposable / Reinforced

NASOPHARYNGEAL AIRWAY

Nasopharyngeal Airways offered a designed and developed using superior grade Silicone or PVC material. Smooth resistant finish ensure no damage to nasal passage, no trauma when inserted in to the nose. Kink resistant design

Nasopharyngeal Silicone Airway

- Made from Silicone Rubber.
- Adjustable stop to maintain exact tube position.
- Autoclavable upto 134°C.

Nasopharyngeal PVC Airway

- Made from medical grade PVC.
- latex free.
- Single use only.
