

EMERGENCY FIRST AID KIT

with Respiratory Care Equipment

REDUCE THE PATIENT'S NEED FOR CRITICAL CARE AS QUICKLY AND SAFELY AS POSSIBLE

RESQ Emergency First Aid Kit with automatic resuscitation Model **ME-797** is very useful for all emergency purpose. Which enables all necessary life saving measures to be taken immediately at the accident location to treat all types of respiratory disturbances by the ambulance services, in Hospital Casualty & Emergency Ward, General Practices, Rescue squad in Railway, Air Lines, Mines, Fire Services & Defense Services.

Contents with features:

- Automatic Resuscitator :

It's pneumatically controlled , time cycled ,flow adjustable, positive pressure Ventilator to meet all emergency situation for respiratory support. Easy to operate with Inspiratory Expiratory & Flow adjustments for breathing frequency of adults & children for continuous ventilation automatically. he silicone type is reusable.

- Manual Resuscitator :

Manually operated resuscitator with double inlet valves for air & oxygen attachments.

- Oxygen Inhalation :

Adult & Child poly ventilmask for concentration of Oxygen & Air through simply turning Oxygen knob, Oxygen flow control from 0 to 10Ltr./min.

- Suction Pump :

Manually operated suction pump to aspirate the mucus , blood or other secretion from the entire airways of Adult, Child or Infant

We don't provide Drug or sterilize items with the kit

EMERGENCY FIRST AID KIT

with Respiratory Care Equipment

REDUCE THE PATIENT'S NEED FOR CRITICAL CARE AS QUICKLY AND SAFELY AS POSSIBLE

Contents with features:

- Intubation Set :

Laryngoscope with three blades & one Standard handle
Endotracheal Tubes Four size disposable
Tooth opener
Magill's forceps

- Diagnostic Instruments :

Stethoscope
Aneroid Sphygmomanometer
Tongue Spatula
Examination tarch
Clinical thermometer

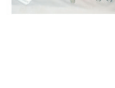

- Standard Accessories :

Face Mask Three different sizes
Oxygen Cylinder small
Preset Regulator for Oxygen
Spanner
Attachment for using bigger cylinder
Cylinderrefilling kit

- Infusions, Dressing & Others :

I.V. Rod in two section
I.V. Set disposable
Adhesive Plaster
Sterilized Gauge
Rolled Bandages
Dressing Scissors
Dissecting Forceps
Tissue Forceps
Haemostatic Forceps
Needle Holder
Disposable Syringe & needle
Splints

We don't provide Drug or sterilize items with the kit

ARTIFICIAL RESUSCITATORS & COMPONENTS

RESQ has a range of Artificial Manual Resuscitators Resuscitator in intended for pulmonary resuscitation.

NATURAL RUBBER ARTIFICIAL MANUAL RESUSCITATORS

ADULT RC 81 07 01 | **CHILD RC 81 07 02**

The resuscitator comes with a outer cover made of latex free, Provides a built in pressure limitation for patient safety ,ideal for manual ventilation in toxic atmosphere, easy to operate for extended periods with just one hand without fatigue. The inner lining made of natural rubber latex free, with one face mask with clear hood,1.5 meter enrichment tubing for oxygen, non breathing valve, Peep valve can be ad.

ADULT RC 81 08 01 | **CHILD RC 81 08 02**

The resuscitator comes with a outer cover made of latex free, Provides a built in pressure limitation for patient safety ,ideal for manual ventilation in toxic atmosphere, easy to operate for extended periods with just one hand without fatigue. The inner lining made of natural rubber latex free, with one face mask.

ADULT RC 81 09 01 | **CHILD RC 81 09 02**

A Textured surface ensuring a firm grip, made of latex free, Provides a built in pressure limitation for patient safety ,ideal for manual ventilation in toxic atmosphere, easy to operate for extended periods with just one hand without fatigue. The inner lining made of natural rubber latex free, with one face mask with clear hood,1.5 meter enrichment tubing for oxygen, non breathing valve, Peep valve can be ad.

ADULT RC 81 10 01 | **CHILD RC 81 10 02**

Made of latex free, provides a built in pressure limitation for patient safety ,ideal for manual ventilation in toxic atmosphere, easy to operate for extended periods with just one hand without fatigue, with one face mask.

RESUSCITATION KIT

For Private Practicing Anaesthesiologists

RESQ Resuscitation Kit with manual artificial resuscitator, along with manual suction, intubation instruments, provided in a carry bag, use full for practicing Anaesthesiologists, in Schools, Swimming Pools, ambulance, Rescue squad in Railway, Air Lines, Mines, Fire Services & Defense Services.

Standard Accessories :

- Adult Resuscitator 1600ml bellow
- Child Resuscitator 500ml bellow
- Infant Resuscitator 250ml bellow
- Laryngoscope set for Adult
- Laryngoscope set for Child
- Flexi-tip blade for difficult Intubation
- Stubby Handle
- Mouth bite Opener
- Mouth to Mouth Respirator
- Guedel Airway's Set
- Laryngeal Airway Mask
- Bougie
- Malleable stylet set
- Tube Cleaning Brush
- Hand Suction

OPTIONAL :

- Oxygen Cylinder
- Oxygen Mask
- Fibre Lite Stylet with Handle
- Howland Lock
- Nasopharyngeal Airway

We don't provide Drug or sterilize items with the kit

ARTIFICIAL RESUSCITATORS & COMPONENTS

RESQ has a range of Artificial Manual Resuscitators Resuscitator in intended for pulmonary resuscitation.

Artificial Resuscitator Silicone Reusable / Autoclave-able

FEATURES:

- Soft silicone resuscitator bag with anti slip grip.
- Built-in 60cmH2O or 40cm H2O pressure relief valve for different models.
- Oxygen Reservoir valve with bag / corrugated tube.
- Side feed Oxygen inlet.
- Non Breathing Valve "L" type with .
- 1.5 meters enrichment tubing.
- One Face mask.
- Bacteria filter or PEEP valve can be added with diverter.

BENEFITS:

- Easy to disassemble -assemble.
- Optimal handling during extended ventilation.
- Patient Valve with swivel enables free positioning of bag without removing the mask from the patient.

TECHNICAL DATA :

- A Textured surface ensuring a firm grip.
- Patient connector outside 22M/15F.
- 100% Latex free.
- Can be autoclaved repeatedly at 134 c Excluding the reservoir bag and tubing..
- The adult & child deliver tidal volume 700 ml / 450 ml.
- Resuscitator is designed according to body weight.
- Adult 30kg / Large child 20-30kg / Child 7-20kg / Infant up to 7kg.
- Storage: 40°C to 60°C / humidity between 40% & 95%.
